Summary

Motivated fresh graduate and full-stack web developer skilled in Python (Django, Flask, FastAPI) and front-end technologies. Passionate about programming, problem solving, and continuous learning. Developed real-world projects during ITI training, including e-commerce and university database systems. Eager to gain hands-on experience, build creative and useful applications, and grow within a collaborative technical environment.

Education

Bachelor's degree in Computer Science and Information Technology,   Asyut, Egypt
The Egyptian E-learning University   GPA: 3.11

Projects

A smart farmland for animal intrusion detection using CNN, Graduation Project   A+   🔗

Noon W Al-Qalam, school mobile application 🔗

  A mobile application designed for a school that provides separate roles for teachers and students.
- **Teachers** can upload course videos, PDFs, and assignments; create group chats; add students; watch school reels; and manage their supervised courses and subjects.
- **Students** can watch course videos and reels, pay school fees, book the school bus, and purchase items through a built-in mini store for books and uniforms.

Multivendor E-commerce Website 🔗
- Developed a full-featured multivendor e-commerce platform that allows multiple sellers to manage their own stores and provide a personalized shopping experience.
- Implemented **JWT authentication via email**, **vendor dashboards**, and **category-based product filtering**.
- Integrated a **chatbot** for real-time customer support and **Paymob** for secure online payments.
- Enhanced performance using **Redis caching** and deployed the **PostgreSQL** database on **Microsoft Azure**.
- Built with a **fully responsive design** for seamless use across all devices.

Donation Website 🔗
- Developed a donation platform using **Django MVT architecture** to simplify and manage online donations.
- Built three main apps: **Accounts** (user registration, login, and profiles), **Transactions** (donation records and payments), and **Campaigns** (create and browse donation campaigns).
- Implemented a complete **authentication system** with **email verification**, **password reset via email**, and **Facebook login**.
- Collaborated with a team to design, develop, and deploy the platform, applying real-world development practices and teamwork principles.

Internships

the database (My SQL) Training, Petra Software   Asyut, Egypt

Entrepreneurship, InnovEgypt-TIEC   New Assuit

Full Stack Development Using Python, Information Technology Institute (ITI)   2024/12 – 2025/04

Skills

FrontEnd — HTML5, Css3, │ Es6, javascript , jquery │ bootstrap , Reactjs

Backend (Python3) — Django │ Flask │ FastAPI

Database — │ Ms-SQL │ MySql │ Postgresql

DevOps & Tools — Linux (Ubuntu) │ Docker

Git/GitHub

Soft Skills — Problem-solving │ Teamwork │ Communication │ Project Management │ Presentation skills

Professional Experience

2COOM, python developer   2025/06 – 2025/10 │ Remotely
